

Part One: Foundations

Introductory material covering the basics.

Chapter 1: Origins

The story begins with a single decision.

A first principle

Three-level headings nest correctly under their level-2 parent.

A second principle

Sibling at the same level chains via /Prev and /Next.

Chapter 2: Aftermath

Returning to level 2 closes the deeper level-3 chain — the next level-3 heading would start a fresh chain under this chapter.

Part Two: Practice

Returning to level 1 starts a new top-level branch.

Chapter 3: Application

All headings since enableOutline() show up in the viewer's bookmarks panel.
